

CONSERVATION Reclaimed Water Valves...

...From the company that has delivered top quality valves to the waterworks industry for more than 70 years.

Cla-Val automatic control valves are the industry standard in potable water distribution systems around the globe. They are also ideally suited for use in reclaimed water applications such as lawn/turf irrigation, fire fighting, air conditioning cooling towers and decorative fountains, which would otherwise utilize dwindling potable water resources.

Features and Benefits

- Extensive product line and size ranges enable “one-stop shopping” for virtually any application -- from treatment to distribution
- Can be easily integrated with SCADA system for optimum control and access to information
- Compact size for small vaults or tight fits
- Fusion bonded epoxy coating inside and out to protect all ferrous surfaces
- Special stem materials available to protect against mineral build-up typically found in reclaimed water systems
- Large pilot system filters are also available
- Expert start-up and maintenance services available using factory-trained technicians
- Quality of materials and workmanship backed by the best warranty in the industry
- Provided by the only manufacturer with 70+ years of design and production expertise
- Satisfaction assured by Cla-Val’s world-class customer service
