

Information is Power

When it comes to system performance, Cla-Val X142PT Pressure Tracker puts you in the know

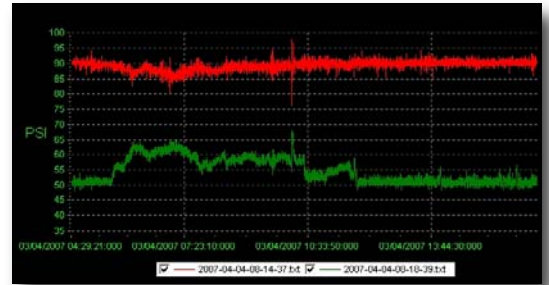

Cla-Val's Model X142PT Pressure Tracker comes equipped with a 540,000 point memory that enables you to acquire and log system performance data without SCADA or electrical power. Acting like a report card for your system, it alerts you to problems and helps to identify areas where improvements can be made. The Pressure Tracker can also be used to monitor for surge events and determine when valve maintenance is required. It is especially well suited to pressure management applications.

Use the X142PT to track performance in many applications!

- Pressure Reducing Valve Stations • Pressure Management
- Altitude Valve Stations • Pump Stations

Using the X142PT is easy!

- Can be field retrofitted to any existing Cla-Val automatic control valve or anywhere you would normally install a gauge
- Data acquired by the tracker can be easily downloaded to your laptop with a standard USB cable
- While data is downloading, the unit's lithium-ion battery automatically recharges for months of continuous service
- The user-friendly tracking software can be downloaded from www.cla-val.com for quick and easy programming of the tracker's control features

Pressure Management Tracker data output showing upstream and downstream pressure

SIMPLE. DURABLE. CONTINUOUS.

Innovation...Experience...Know-How

As a leading manufacturer of automatic control valves, Cla-Val has served the following markets since 1936:

- Waterworks
- Fire Protection
- Aviation Ground Fueling
- Marine and Shipboard Service

We offer many advantages to our customers worldwide, including the following:

- In-house Engineering Department
- Onsite investment and sand casting foundries able to pour more than 50 different metals and alloys
- 20-acre manufacturing facility in Costa Mesa, CA
- Production facilities in Perris, CA; Ontario, Canada; Switzerland; the United Kingdom; and France
- Extensive technical training capabilities
