## Reclaimed Water Valves...

...From the company that has delivered top quality valves to the waterworks industry for more than 70 years.

Cla-Val's superior quality automatic control valves are ideally suited for use in reclaimed water applications and deliver the following benefits:

- Extensive product line enables "one-stop shopping" for virtually any application --- from treatment to distribution
- Can be easily integrated with SCADA system for optimum control and access to information
- Compact size for small vaults or tight fits
- Fusion bonded epoxy coating inside and out and special stem materials available to handle the challenges associated with the quality of reclaimed water
